

Cubox

**AI-driven risk analytics: gaining
insights into customer behavior
in your factoring business.**

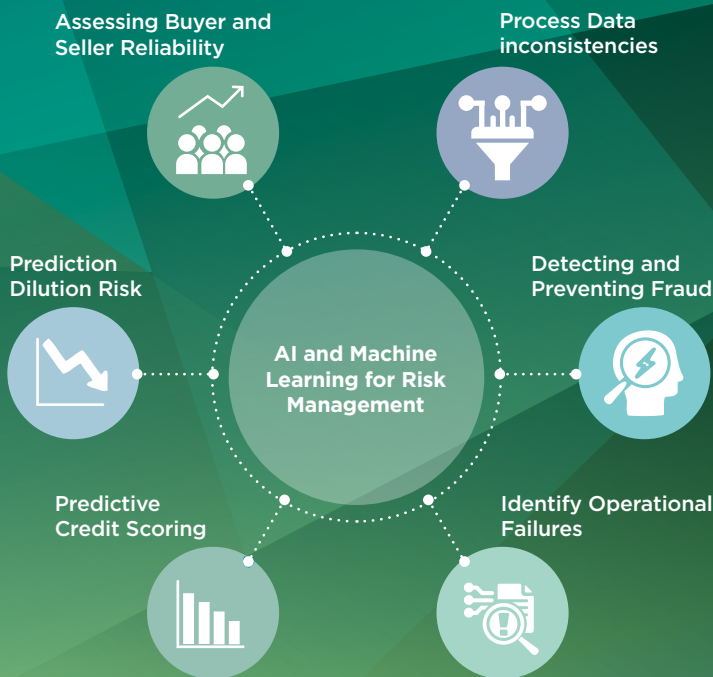

eFCOM 
The Standard of Factoring Software

Start unlocking the full potential of your factoring data.

Where CubX supports you:

- **Analyse data**, including credit scores, financial reports and customer payment history.
- Using today's data and in **near real time**, so we can accurately predict the likelihood of late or even defaulted payments.
- Our tool is made to identify risks early and classify them based on the creditworthiness and customer behavior of debtors, clients and receivables. It **detects and predicts opportunities and risks** in the ecosystems of a factoring organization.

Benefits of CubX in a nutshell:

CUTTING-EDGE: CubX uses state-of-the-art machine learning algorithms.

SCALABILITY: CubX adapts to your particular ecosystem in a short period of time.

POTENTIAL OPPORTUNITIES: CubX enables you to identify risks and potential opportunities across clients, debtors, industries, or regions.

TIMELY WARNINGS: With CubX you can receive timely alerts about possible payment delays.

RISK MONITORING: CubX offers an enhanced risk monitoring portfolio by helping you to minimise credit, fraud and operational risks.

CASH FLOW MANAGEMENT: With CubX, you gain unparalleled visibility into your cash flow, ensuring smarter decision-making.

STRATEGIC VIEW: CubX empowers financial institutions and enterprises in strategic customer categorization.
